## WORK EXPERIENCE

### Roamm! | *Founding Engineer*

Startup Effort - JUN 2023 - Present

- I worked alone to build a media feed showing locations of interest in cities worldwide, leveraging data from Google and TripAdvisor.
- Implemented features to group locations by descriptive tags to make search intuitive and straightforward, which garnered positive feedback from beta testers.
- Integrated vector search to increase the quality and relevance of search results.

Technologies used: Solito (React Native + Next.js), Redux, Firebase, Typesense Search

### RootsLx, Lagos (Remote) | *Frontend Engineer*

African Skincare Brand (Contract) | September 2022 - May 2023

- Led a complete redesign effort to optimize the product listing and checkout of the e-commerce application, which led to a 45% increase in unique website visits in less than three months.
- Integrated a custom CMS into an internal tool that streamlined customer service and increased recurring revenue by 12%.

Technologies Used: Next.js, TailwindCSS, DatoCMS, MongoDB, Prisma, Clerk Auth

### Oprime Tech | *Frontend Developer*

Tech firm (Full time) | Jun 2020 - July 2022

- I developed a booking platform and dashboard for a catering and restaurant business, which increased rates of sales closing online and streamlined customer interaction for the client.
- I collaborated with a group of UX designers and engineers to create an in-house design system that streamlined the development process, improved the user experience of each web application, and passed numerous accessibility assessments.

## SKILLS

### Languages

HTML,  
CSS3,  
Javascript(ES6),  
Typescript.

### Technologies

React.js  
Next.js  
Redux,  
tRPC  
StoryBook  
Vite  
Arc UI  
Zag.js
